EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Linda Blair Meier on May 26, 2004.

The application has been amended as follows:

The Claims:

In claim 2, line 2, delete "1" and insert – 6 –.

In claim 6, line 3, delete "albeit".

In claim 6, line 7, delete "albeit".

In claim 6, line 12, delete "albeit".

In claim 7, line 1, delete "1" and insert – 6 –.

Cancel claim 1.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance. Note that, the Examiner asserts that the clause "is present" in reference to the surfactant, poly D-glucosamine, and halogenated furanone as recited by instant claim 6 requires

Art Unit: 1751

that each of these components is present in the composition in amount greater than 0% by weight and up to the upper limit stated.

Of the references of record, the most pertinent are Garris (US 5,776,876) or WO99/03959. '959 teaches a surface active composition useful for cleaning various types of substrates such as articles of clothing, various types of hard surfaces as well as human hair and skin, the composition containing an esterquat, a chitosan and/or chitosan derivative and a protein hydrolyzate. See Abstract. However, '959 does not teach the use of a glycol ether as recited by the instant claims.

Garris teaches effective, multi-use filter cleaning compositions which include 55 to 60% of a strong acid, 1% to 40% of a surfactant, and 0.5% to 20% of a sequestrant/builder. The filter cleaning compositions optionally include 0.5% to 10% of a water-soluble organic solvent, and/or 0.5% to 10% of a nonionic surfactant. See Abstract. Additionally, Garris teaches that components such as colorants, fragrances, and thickeners may also be added to the composition. See column 2, lines 14-25. However, Garris does not teach or suggest the use of cellulosic thickening agents as recited by the instant claims. Additionally, none of the examples of Garris teach the use of chitosan or similar components. Furthermore, the Examiner asserts that nothing in Garris would point, direct, or motivate one of ordinary skill in the art to formulate a composition containing chitosan in addition to the other requisite components of the composition in the specific proportions as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a composition having the specific pH containing a surfactant, chitosan, an acid, cellulosic

Art Unit: 1751

thickener, halogenated furanone and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

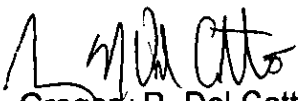

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory R. Del Cotto whose telephone number is (571) 272-1312. The examiner can normally be reached on Mon. thru Fri. from 8:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
